Dear *Suresh Kumarji*

Sub: CDP 2015 review

Residents and citizens of many residential localities have been complaining bitterly about the impact of CDP 2015 on their localities – the impact of rampant, uncontrolled and unfettered commercial development in residential areas are posing many dangers and inconveniences to people living there. In this context, a review of CDP 2015 is requested and recommended – where commercial developments in residential areas are halted and if permitted only done with the express involvement and consent of people living in the localities.

This review may be initiated immediately.

Very truly yours,

*Rajeev*
